

Browsers UI Libraries

Some Libraries to help you take a design or screenshot and place it within a variety of different browser interfaces.

Installation

- Launch Sketch
- Select **Sketch → Preferences**
- Select the **Libraries** tab
- Drag and drop the **Browsers UI Library - ###** Sketch document(s) into the window

Requirements

Sketch

These Libraries was designed using Sketch 92 and so I recommend using the Library with **Sketch 92 and above** (although I don't foresee any issues with recent versions of Sketch).

SF Pro Font Family

You will also require the SF Pro font family which is available free from **<https://developer.apple.com/fonts>**

Segoe UI Font Family

For the Windows browser variants you will require the Segoe UI font family which is available free from **<https://www.cufonfonts.com/font/segoe-ui-4>**

Updates

As you have downloaded this Library through **Gumroad**, you will be automatically notified via email whenever an update has been released.

Feedback, Problems, Requests?

Feedback

If you have any feedback or questions or just want to say hi, you can use the **form on my website**.

Problems & Requests

If you have found any problems with the Library or have any requests then you can let me know using the **GitHub Issues Board**.

License

The short version is that there is no License.

The long version is do whatever you like with it aside from repackaging, redistributing or selling it – instead, please link people to the **Browsers UI Libraries** page.
